### TEXAS WELL OWNER NETWORK PROGRAM

The Texas Well Owner Network (TWON) program is a free, educational training for Texas residents who depend on household wells for their water needs. TWON is for private well owners who want to become familiar with groundwater resources, septic system maintenance, well maintenance, water quality and water treatment. Private well owners are independently responsible for monitoring the quality of their wells. Essentially, they are the operators of their own water system and are responsible for ensuring that their water is safe.

### BRING YOUR WELL WATER SAMPLES!

Well owners may turn in water samples to be screened for nitrate-nitrogen, total dissolved solids (TDS), and *E. coli* bacteria for \$10 per sample. Pick up approved sample containers with instructions at your local Texas A&M AgriLife Extension Office in Kimble, Edwards or Sutton Counties or your local Groundwater Conservation District Office in Junction, Rocksprings or Sonora and return those samples to the same location by 10 am on October 14, 2020.

Pre-register for the workshop at

Funding for the Texas Well Owner Network is through a Clean Water Act nonpoint source grant provided by the Texas State Soil and Water Conservation Board and the U.S. Environmental Protection Agency. The project is managed by the Texas Water Resources Institute, part of Texas A&M AgriLife Research, AgriLife Extension and the College of Agriculture and Life Sciences at Texas A&M University.
